SUMMARY

Enthusiastic software engineering student with a strong foundation in Java, Python, AWS and JavaScript. Proven ability to develop and implement innovative software solutions, including virtual assistants and sentiment analysis tools. Skilled in problem-solving, critical thinking, and effective communication. Committed to continuous learning and contributing to collaborative team projects.

SKILLS

• LANGUAGES

Java ,Python, JavaScript,HTML ,CSS

• FRAMEWORKS

React JS, Vue, Node JS, Tailwind

• TOOLS/DB/CLOUD

AWS, MySql , Git, SSH, Docker, Linux, Firebase, Visual Studio

• SOFT SKILLS

Team Leadership, Problem Solving, Technical Support, Installation & Management

PROJECTS

AI Chatbot

2023 [OPEN PROJECT](#)

TECHNOLOGY USED: OpenAI API, Gradio, Python

- Developed an AI chatbot using OpenAI API and Gradio.
- Enabled dynamic, context-aware conversations, ensuring coherent and meaningful user interactions.
- Designed a user-friendly interface with Gradio, facilitating real-time chat experiences.
- Implemented a system to log and save conversation history for analysis and continuous improvement.

Online Education Platform(Educan)

2022 [OPEN PROJECT](#)

TECHNOLOGY USED: HTML, CSS, JavaScript,AWS

- Developed an online education platform offering a wide range of courses in computer science, business analysis, and digital marketing.
- Implemented a user-friendly interface to navigate course categories and manage accounts.
- Integrated features like course exploration and quick links for enhanced user experience.

EXPERIENCES

MY SOCIAL PULSE [Ref. Letter](#)

Digital Marketer & Data Analyst • 2021 - 2022

- Managed and optimized digital marketing campaigns, enhancing the company's online presence.
- Analyzed marketing data to guide decision-making and contributed to refining overall strategy.
- Collected and interpreted data to provide actionable insights, helping to shape marketing initiatives.
- Analyzed real-time market sentiment from various sources like social media, news, and forums, guiding trading decisions and strategy adjustments.
- Collaborated with data science teams to refine sentiment algorithms, improving accuracy and timeliness of predictions in response to market fluctuations.

EDUCATION

Bachelor of technology (CSE)

GALGOTIAS UNIVERSITY • 2021–2025

Courses: Cloud Computing, Cyber Security, Machine Learning, Operating Systems, Software Testing

8.66 CGPA

MATRICULATION

ST SEVERINS HIGH SCHOOL

9.6 CGPA

INTERMEDIATE
